Shrina Desai, M.D.
Child and Adolescent Psychiatry Fellow
Department of Psychiatry
Virginia Commonwealth University
Introducer: Bela Sood, M.D.

Learning Objectives:
- Recognize and promote awareness on the problem regarding child sex trafficking
- Identify the signs/symptoms of child sex trafficking victims
- Review the resources available in Virginia to victims and their families affected by child sex trafficking
- Recognize and discuss the need for further health care involvement

May 11
The Link Between Animal Abuse and Other Family Violence: Species-Spanning Medicine

Phil Arkow
Coordinator, National LINK Coalition
Chair, Animal Abuse & Family Violence Prevention Project, the Latham Foundation
Instructor, Animal-Assisted Therapy & Activities, Harcum College & Camden County College
Instructor, Animal Abuse and Interpersonal Violence, University of Florida
Consultant, ASPCA
Introducer: Sandra B. Barker, Ph.D.

Learning Objectives:
- Recognize the roles of pets in contemporary families and how these emotional relationships are exploited in family violence situations
- Apply greater awareness of the implications of animal abuse and neglect to the care of patients in hospital and private practice settings
- Describe the significance of animals as a factor in individual and public health, the improvement of social capital, and in the prevention of youth, family, and community violence
- Apply strategies and resources to utilize the “One Health” principle to better protect domestic violence and child abuse survivors, and neglected elders, by addressing welfare issues
May 18*
